### Career Objective

Seeking a dynamic role in a progressive organization that nurtures professional growth and allows me to leverage my skills for mutual success. Eager to contribute to a team-driven environment focused on excellence, job satisfaction, and continuous self-development to achieve personal and organizational objectives.

### Internship

**Junior Data Analyst**, *ThirdEye Data*  
(Feb 2024 -present)

#### Project:Salary Disparity Analysis in Tech

- Analyzed trends in the tech job market using data-driven insights.
- Tools & technologies used: Python, pandas, matplotlib, seaborn.
- Approach - Descriptive statistics and data visualization. Explored salary distributions, job role trends, and remote work preferences.

### Academic project:

#### Facial Keypoints Detection using MobileNetV2 Architecture

- Developed a deep learning model to detect facial key points in images.
- Leveraged MobileNetV2 architecture for improved performance in handling variability and complexity.
- Utilized Convolutional Neural Network (CNN) to extract features and predict 15 facial key points.

### Achievements

NCC cadet'B' certificate  
Wids Datathon(314)

### Hobbies

yoga, listening Music

### Education Background

**SDB School Tadas,Shiggon,Haveri**

High school

Aggregate: **83.04%**

**K.I.E C.I.Munavalli Polytechnic, Hubli**

Diploma in Computer Science

Aggregate: **72.2%**

**KLE Technological University, Hubli**

B.E Computer Science & Engineering,

CGPA: **8.35**

Graduating 2024

### Technical Skill

C++, Python, DBMS, OOPS,  
CN, Machine learning ,  
MongoDb,pyspark

### Certification and courses

- AWS Cloud Computing 101
- introduction to Open CV,simplilearn
- Juniper Networks Certified Associate, Junos
- Data Analysis in Python
- Machine Learning, simplilearn
- SQL Basic, HackerRank
- Python Basic, HackerRank
